

AspirinWorks[®] Test Results

> 1500 pg/mg
No Aspirin Effect

≤ 1500 pg/mg
Aspirin Effect

Aspirin Ingested

Ensure Compliance

Step 1

Check for Concomitant Ibuprofen or NSAID usage—this can inhibit effect of aspirin

Step 2

Modify Aspirin Dose

Step 3

Check for Elevated Cholesterol—this can alter aspirin's effect

Lower and Control Cholesterol

Step 4

Consider underlying condition i.e. Pre-Diabetes/Diabetes

Retest

If results remain > 1500 with no aspirin effect consider changing dose; additional and/or alternative anti-platelet therapy
